# About us

Established in 1999, Elite Landscapes is an external landscape contractor with a difference! Bringing stunning designs to life and delivering a top quality finish. Our core business is commercial landscape construction and maintenance on projects valued between £100k and £10 million.

We take on projects of all types and sizes and relish a challenge; over the years we've worked at many different sites that often present their own set of unique obstacles to overcome – which we often deliver ahead of schedule.

Offering a full landscaping service to developers and main contractors, we pride ourselves on being able to deliver the complete package. This includes complex hard landscaping, water features, irrigation, external lighting, street furniture, semi-mature tree planting and all elements of soft landscaping through to maintenance.

All projects are treated as individual cases with planning, procurement, full implementation and on-going maintenance offered as a full package, or individually tailored packages to suit client requirements.

# Why choose us?

When you work with Elite Landscapes, you'll benefit from our extensive experience and the huge range of landscaping services we offer.

---

## EXTENSIVE EXPERIENCE

We have over 20 years of experience in the industry

---

## HIGHLY SKILLED AND WELL-MANAGED WORKFORCE

We have worked 526,500 hours in 2020 alone, with no health and safety incidents reported

---

## STRONG BUSINESS

Our annual turnover is over £30m

---

## LANDSCAPES BIG OR SMALL

We have the capacity and capability to take on jobs that range in size, scale and budget, from £100k to £10 million

---

## LARGE WORKFORCE

With over 300 landscapers working with us, we're able to deliver even the largest and most complex projects on time

---

## AWARD WINNING CONTRACTOR

Winner of several BALI awards and winner of Pro Landscaper and Supply Chain Awards

# Case study: White City

**CLIENT: ST JAMES**

**PROJECT VALUE: £9M**

We delivered extensive landscaping to this high quality development, next to Westfield's flagship shopping centre. It includes several large water features, semi-mature trees and a rich variety of green spaces, enhancing the environment for residents and creating a welcoming community feel. There are also beautiful roof gardens and terraces, magnolia gardens and spring gardens.

# Case study: Fulham Wharf

**CLIENT: BARRATT LONDON**

**PROJECT VALUE: £4.5M**

At over an acre in size, Fulham Wharf has the largest roof gardens in London, located three floors up above a Sainsbury's superstore. Our work on this landmark project included extensive water features and all hard and soft landscaping, creating a series of 'gardens within the garden' with careful planting for interest all year round. The result is an inspiring and tranquil urban sanctuary.

# Case study: London Dock

**CLIENT: ST GEORGE**

**PROJECT VALUE: £4.7M**

A striking scheme for the landmark London Dock development in Wapping. It includes one of the biggest pavement water features in London, and hard landscaping that reflects the heritage of the area. Greenery, trees and planting add softness to this urban setting.

# Case study:

# One Blackfriars

**CLIENT: ST GEORGE**

**PROJECT VALUE: £2.5M**

With one of the largest roof gardens in London, outside space is the central focus at One Blackfriars and has made it one of the most sought-after developments in Zone 1. We created a welcoming urban oasis with paving, seating and lighting, invigorated with lush planting and water features.

# Case study: Goodman's Fields

**CLIENT: BERKELEY HOMES**

**PROJECT VALUE: £4.1M**

Located in the heart of the city of London, this high quality external space features life size horse sculptures running through a linear water feature. We brought the concept to life, managing and installing the full scheme from concrete construction to soft landscaping, plus creating roof gardens at various levels.

# Case study: Kidbrooke Village

**CLIENT:** BERKELEY EAST

**PROJECT VALUE:** £4M

Winner of the prestigious Sir David Attenborough Award for Enhancing Biodiversity, Cator Park is a beautiful space in the heart of south east London's Kidbrooke Village. We planted a staggering 5,498 new trees and shrubs and 13,751 new herbaceous and climbing plants; collaborated with Apes Adventure Playground to deliver a fun and athletic play area and sports facilities; and built an educational ecology trail.

# Case study: Chelsea Creek

**CLIENT: ST GEORGE**

**PROJECT VALUE: £3.2M**

This luxurious collection of apartments demanded elegant and refined outdoor spaces. We delivered stunning roof gardens with outdoor kitchens, hot tubs, paved terraces and exotic planting to penthouses on the 21st floors, along with ground floor exterior landscaping including detailed water feature works and a spectacular illuminated pedestrian bridge.

# Our ethos

We pride ourselves on guaranteeing high-quality, sustainable, creative landscapes for our clients, who reap the benefit of our experience in the industry.

We are committed to upholding the strictest health and safety standards to ensure care and professionalism are maintained across all areas of business. Our site operatives are all CSCS approved, and hold appropriate plant tickets for operating machinery, so you can be assured of our standard of work.

Our charitable work is a joy, and one that we are incredibly grateful to be able to partake in. This year we have donated generously to various charitable causes close to our hearts. We are proud to be able to support Slough Food Bank with generous donations and an office food drive put together by the team, and Crisis Christmas, who we donated our 2020 Christmas Party fund to. We've also been delighted to support Crisis and Burnham Youth Centre over the years and have loved being able to give back to the local community.

Sustainability is very important to our work here at Elite. We are passionate about building for a better, greener future and constantly look for new ways to minimise our carbon footprint. This could be by choosing suppliers who recycle pallets after use; using electric lawn mowers and hedge trimmers on maintenance work; more effective waste management or communicating with our supply chain to minimise plastic wrapping on orders. We also use biological controls for pests, reducing the need for chemicals.

# Keeping landscapes looking their best

## MAINTENANCE

We ensure all our commercial landscaped areas, including trees, shrubs, bedding and lawn areas, are carefully maintained to keep them looking good. This is monitored through a schedule, which we provide for all our new sites. The schedule covers all our maintenance activities, including a vigorous lawn maintenance scheme of aerating, scarifying, top-dressing, weed and disease control.

Through careful planning and years of experience, we are able to keep all soft landscape areas looking their best all year round.

Our maintenance division are available to help provide more information and can be contacted at [maintenance@elitelandscapes.co.uk](mailto:maintenance@elitelandscapes.co.uk)

## TREE SURGERY

We also undertake tree works, from crown lifting and reduction through to tree felling and stump grinding. These projects vary from extensive tree felling works on woodlands such as Trent Park for Berkeley Group PLC, to working in tighter, more complicated sites with power lines and railway tracks to accommodate.
