A GUIDE TO KEY SUSTAINABLE LANDSCAPE DESIGN

Bringing Landscape design to life

Managing sustainability and ensuring ethical standards are important to us. We are working to become the leading sustainable hard & soft landscaper in the UK and we are constantly meeting goals and measuring our progress to meet this goal.

SUSTAINABLE

Protecting Nature

- At Elite protecting nature and encouraging biodiversity are always a priority.
- We always go the extra mile, on one site we helped to trap and relocate an endangered Great Crested Newt before starting construction.
- We avoid construction during nesting season to encourage biodiversity

Bird and Bat boxes placed on site to provide a welcome refuge & safety

Wildflower planting provides pollinators & insects food, shelter & breeding sites

at the heart of our design

Over 500 trees planted every year

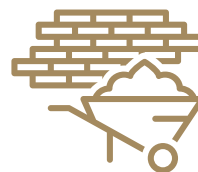

Over 1 million plants ordered

Drainage systems

Renewable energy tools

Ethically sourced materials

Locally sourced supplies & labour for sites

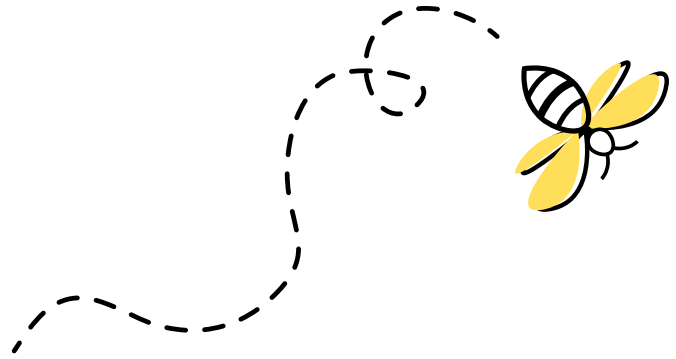

Reducing waste on site is extremely important to us. Not only do we re-use our materials but we even return all the reusable packaging to our suppliers to reduce waste.

FEATURES

Our Sustainable commitments:

- Members of the UK Green Building Council and the Considerate Constructors Scheme, ensuring we are consistently meeting their standards.
- Partnered with the Supply Chain Sustainability School to ensure our knowledge is always accurate.
- We have an environmental management system accredited with ISO 14001.

A member of the UK Green Building Council.

Adhering to a common vision to achieve net zero carbon in Construction

A member of the Considerate Constructors Scheme.

Ensuring ethically sourced materials from all our suppliers.

MEET OUR SUSTAINABILITY OFFICER

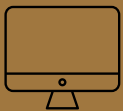

Nicole Murray

A note from our Sustainability Officer:

“A sustainable world is a better world, one where not only some benefit from its rewards but all. Sustainability is about future proofing, and to reap those rewards we must all take action no matter how big or small that action may be.”

Proud to be prioritising sustainable construction and working towards a common vision
